

Corporate Presentation *March 2024*

TSXV: ALV
OTCQX: ALVOF

Alvopetro - A Leading Brazilian Independent Natural Gas Company

First Brazilian integrated onshore natural gas producer

Strong operating and financial results well ahead of expectations

Balanced reinvestment and stakeholder return model

Demonstrated ESG commitment

Proven team with successful LatAm track record

All references to “\$” refers to U.S. dollars. C\$ refers to Canadian dollars

At a Glance – Value, Yield, Growth

Market Summary

Shares outstanding ⁽¹⁾	36.6 million
Average daily trading volume ⁽¹⁾	59,018
Insider ownership ⁽¹⁾	10.6%
Market cap/Enterprise value ⁽²⁾	\$149 million/\$136 million

Operating & Financial

Production – Q4 2023	2,143 boepd
Production mix	95% natural gas
2P Reserves ⁽⁴⁾	8.7 MMboe
2P NPV 10 before tax ⁽⁴⁾	\$309.7 million
2P NPV 10 after tax ⁽⁴⁾	\$260.6 million
Q4 funds flow from operations ⁽³⁾⁽¹⁰⁾	\$12.4 million
Enterprise Value/annualized FFFO ⁽¹⁰⁾	2.7 times
Working capital ⁽³⁾⁽⁷⁾⁽¹⁰⁾	\$13.1 million
Quarterly dividend – Q1 2024	\$0.09/share

Reserves & Resources, NPV10 before tax ⁽⁴⁾⁽⁸⁾⁽⁹⁾

Dividend History (Current Annualized Yield – 8.8%)

Focused on Delivering Shareholder Returns

1,297% return since 2018

including dividends (based on payment date), assumes cash returns without reinvestment

Brazil a Growing Market with Attractive Fundamentals

Largest oil producer in S. America and 9th globally

New natural gas market. 48% of supply is currently imported

World's 12th largest economy

Attractive fiscal regime with 5.5-11% royalties & 15%-34% income tax

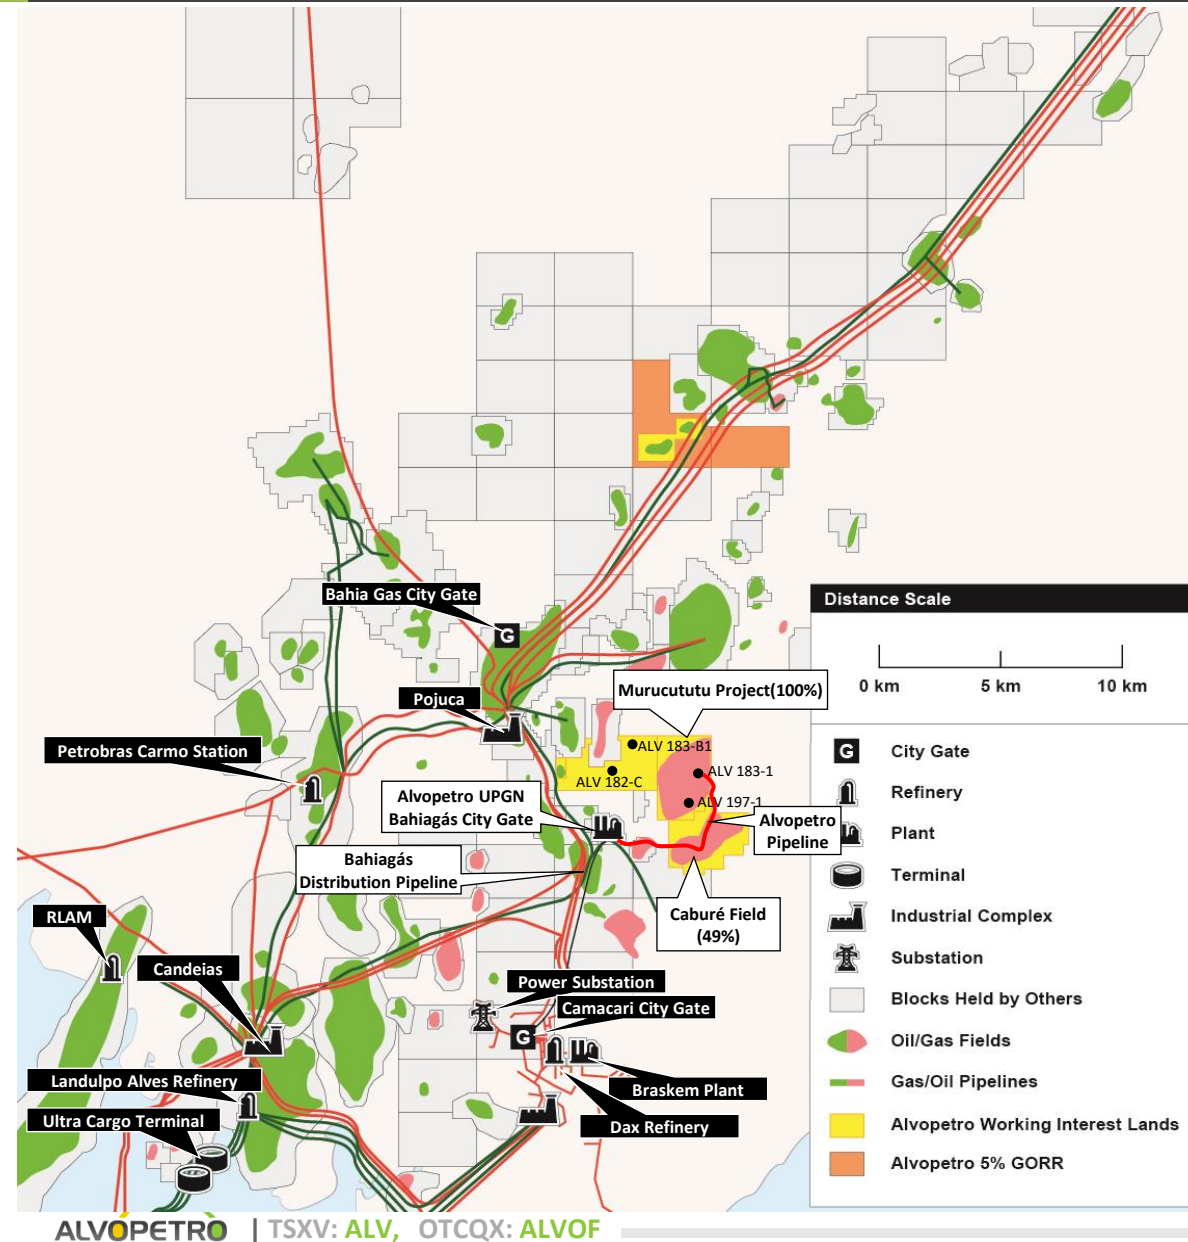

Stable regulatory framework attracting new investments

Expanding onshore oil & gas market

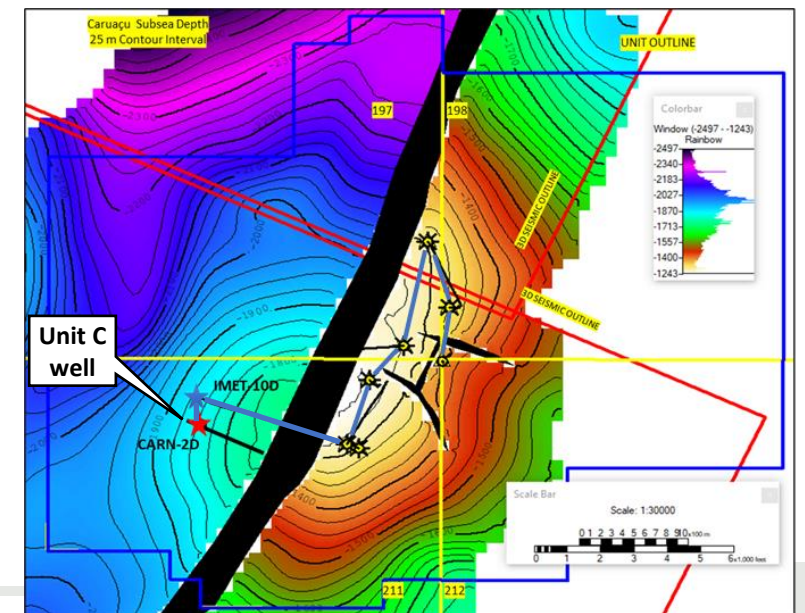

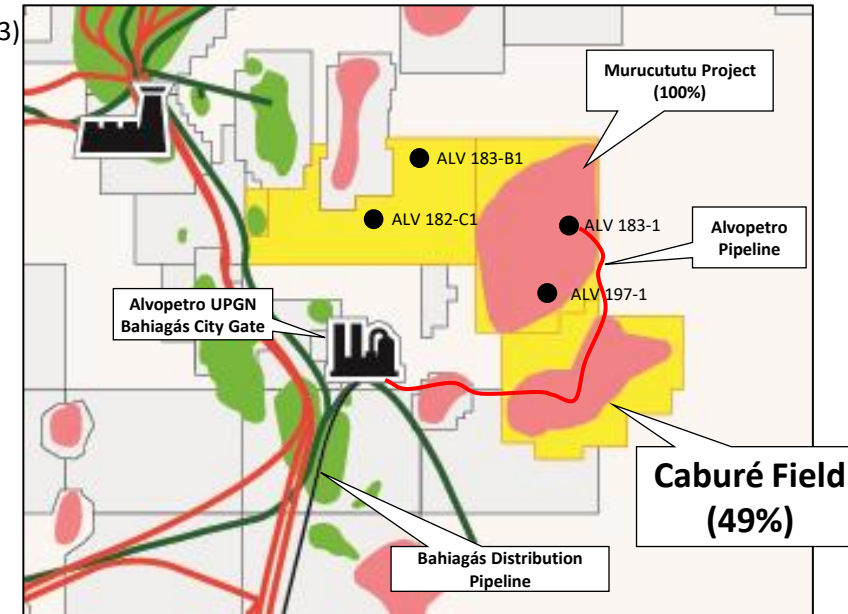

State of Bahia – Reconcavo Basin

- Oldest producing basin in Brazil: 23.9 Mbopd + 2.2 e6m3/d (77 MMcf/d)
- Brazil's 4th largest city Salvador (pop 2.9 million)
- Well developed industrialized region
- Majority of natural gas consumed in Camacari industrial complex
- Highly strategic infrastructure

Caburé – Asset Overview - 49.1% ALV⁽¹³⁾

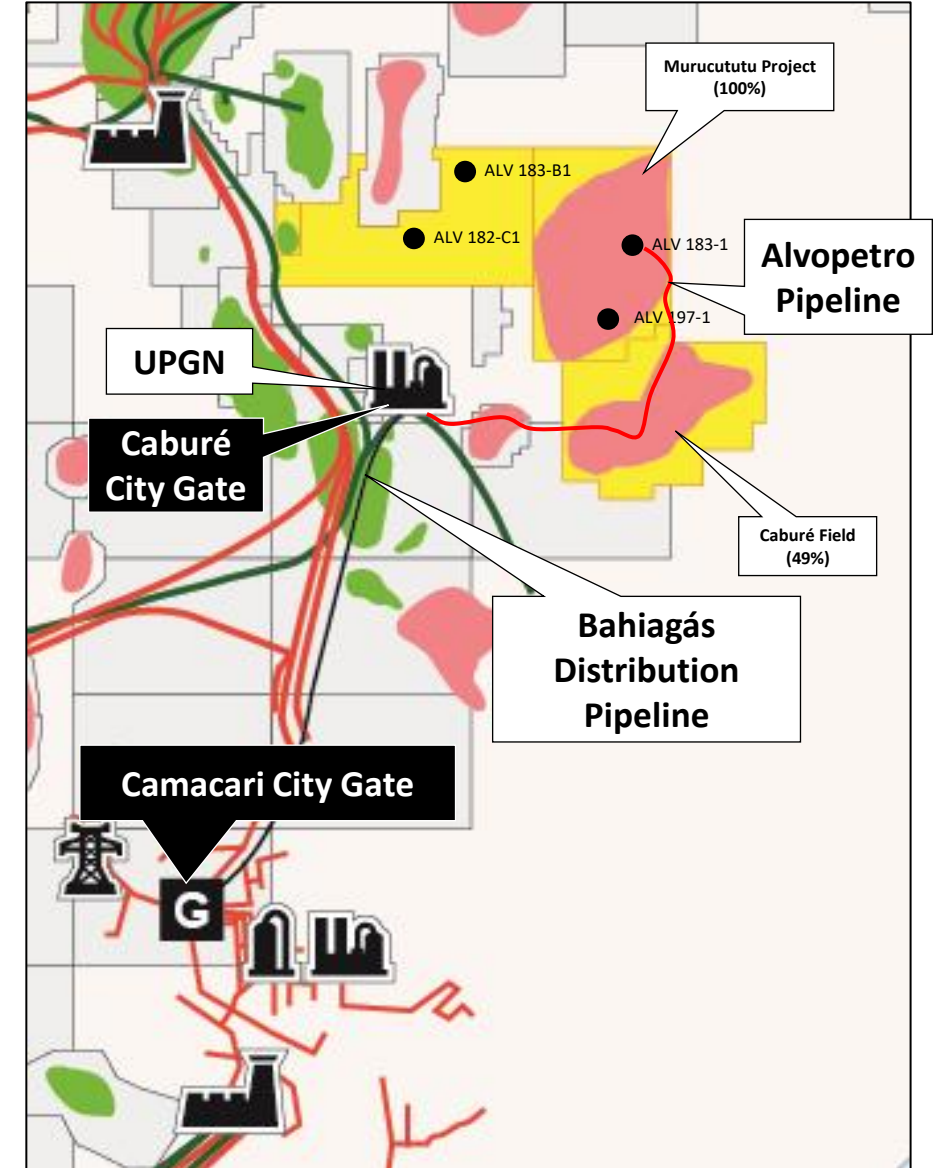

- The Caburé field is a joint development of a conventional natural gas discovery - ALV 49.1%⁽¹³⁾
- Unitized area development - 8 wells and all production facilities
- Gross Unit production capacity up 33% to 21.2 MMcfd (600 e3m3)

Virtual Field Tour: <https://www.youtube.com/watch?v=p1AvDNX0YXk&t=16s>

Midstream - Infrastructure & Marketing (100% ALV)

- 11-km transfer pipeline & Gas Plant (UPGN) with 18+ MMcfpd capacity
- Bahiagás 15-km Distribution pipeline & 70 MMcfpd citygate at our plant site
- Price set semi-annually based on Brent, Henry Hub and UK NBP benchmark prices
- Gas price floor US\$6.22/MMBtu and ceiling of US\$10.58/MMBtu (indexed to US CPI)
- Natural gas price effective Feb 1/2024 to BRL1.94/m³, US\$12.36/Mcf⁽⁵⁾
- Highly strategic legacy asset that positions ALV to unlock our natural gas potential

Gas Sales Agreement (GLJ Forward Pricing 12/31/23)

As of February 1, 2024 Alvopetro’s contracted natural gas price is at the ceiling. Forecast above reflects GLJ price forecast January 1, 2024. Floor & ceiling prices incorporate US inflation of 2%. BRL:USD 5.2:1

Strong Production Results

Alvopetro - Daily sales volumes (boepd)

**field estimates*

Operating Netback

Q4 operating netback margin of 90%

Operating netback as a % of realized sales price

Q4 realized price of \$77.60/boe

Including natural gas sales of \$12.85/Mcf

Subtract: Q4 royalties of \$2.07/boe

Q4 effective royalty rate 2.7% (lower than statutory rates of 5.5% to 11%) as natural gas royalties based on raw/unprocessed natural gas value (closer to Henry Hub)

Subtract: Q4 production expenses of \$5.84/boe

(lower than Q3 with higher production volumes)

=Q4 operating netback of \$69.69/boe

Strong Q4 operating netback, a measure of operating profitability per unit of production (boe)

Industry-Leading Operating Netback Margins

Alvopetro Q4 2023 operating netback margin compared to other selected publicly listed oil and natural gas producers operating in Latin America, Canada and US

Note: that all netbacks and netback margins computed based on USD equivalent.
Companies included in analysis: CHK, FEC, GTE, JOY, PXT, RECV, RRR, SWN

Disciplined Capital Allocation – Balancing Organic Growth & Returns

Funds Flow From Operations⁽¹⁰⁾ & Capital Allocation

Allocation of Funds Flow from Operations
July 2020 to December 31, 2023

Balanced reinvestment and stakeholder returns since July 2020:

- 44% of funds flow from operations dedicated to reinvestment
- 48% returned to stakeholders (dividends, repurchases, debt & interest payments, capital lease)
- 8% dedicated to building financial resources

Organic Growth Plan

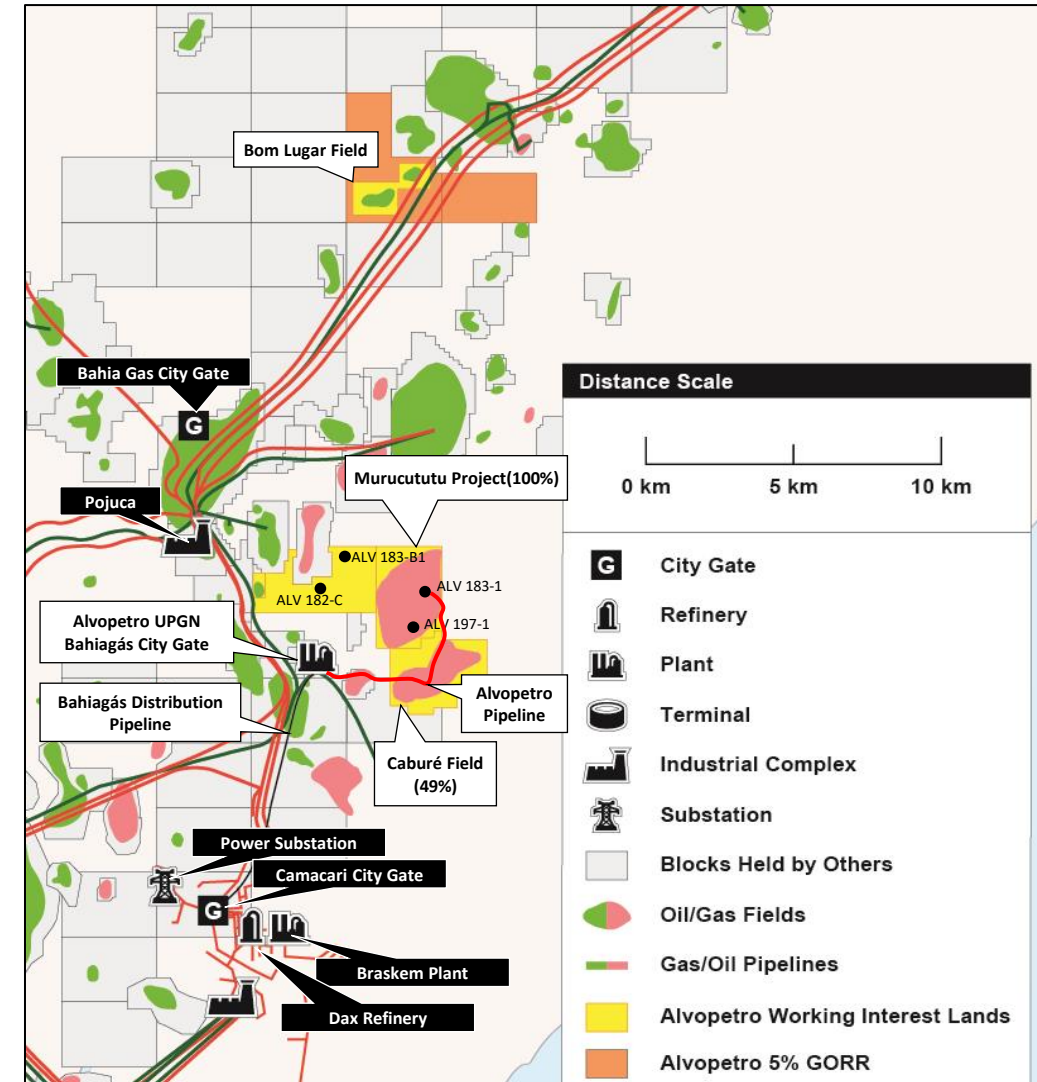

Near-term goal of 18 MMcfepd
Longer-term vision of 35 MMcfepd

Caburé Unit and midstream expansion

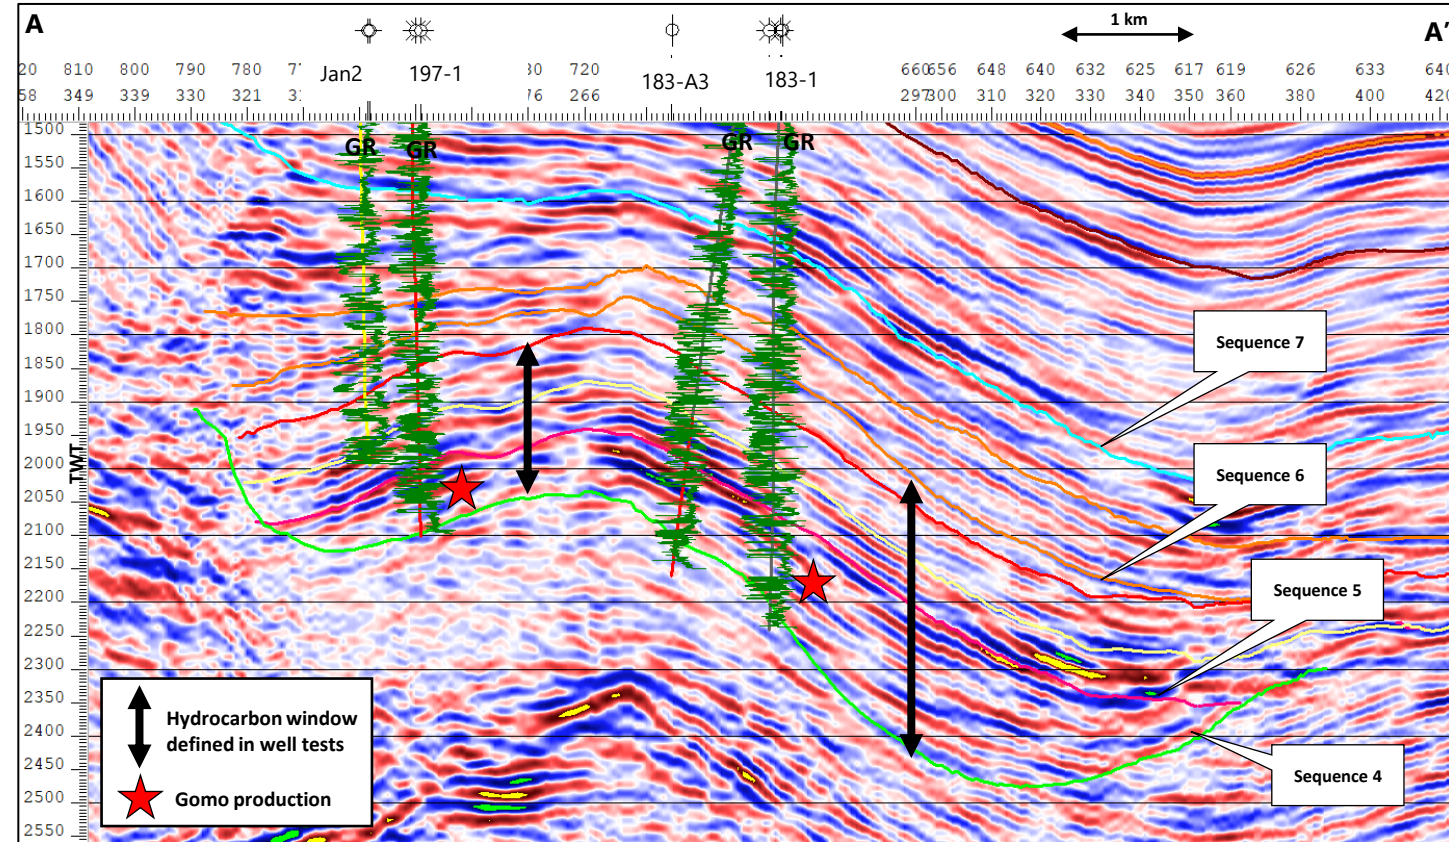

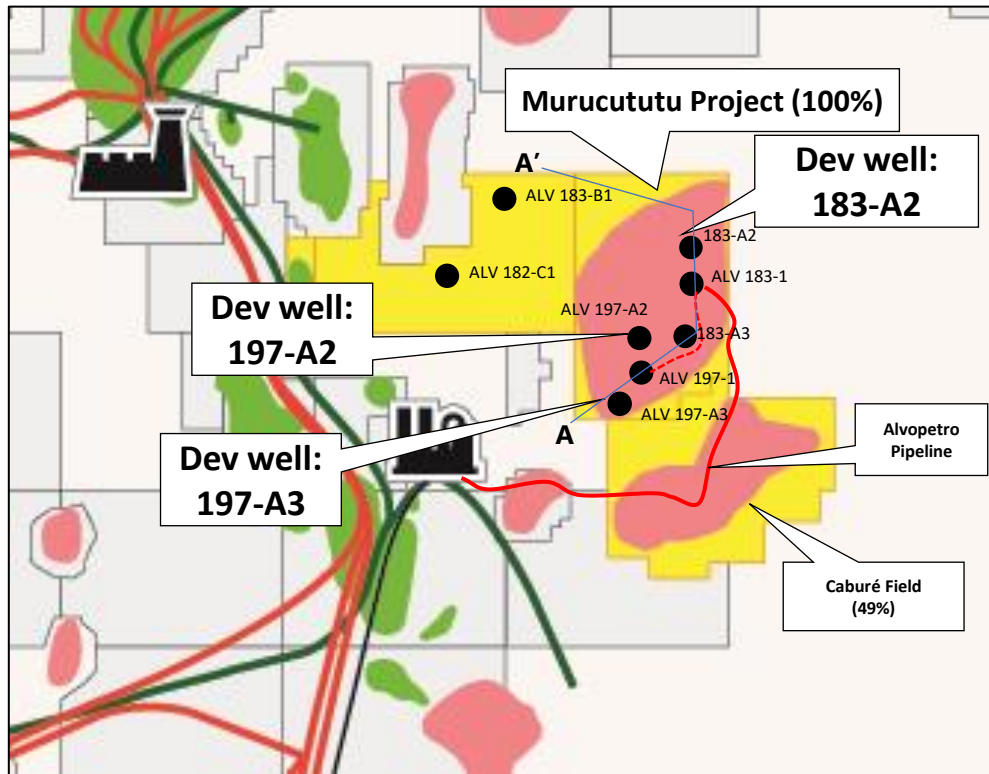

- Gas plant expansion to 18+ MMcfpd completed in July 2022
- Expanded Unit capacity with additional development wells and facility expansion

Murucututu (100%)

- 183(1) production facilities in-place
- Production completion and optimizations planned for 3 existing wells
- Multi-year development in Gomo and Caruaçu Formations
- 2P Reserves, Risked Best Estimate Contingent & Risked Best Estimate Prospective Resource of 4.6 MMboe, 5.4 MMboe & 9.6 MMboe, respectively⁽⁴⁾⁽⁸⁾⁽¹¹⁾

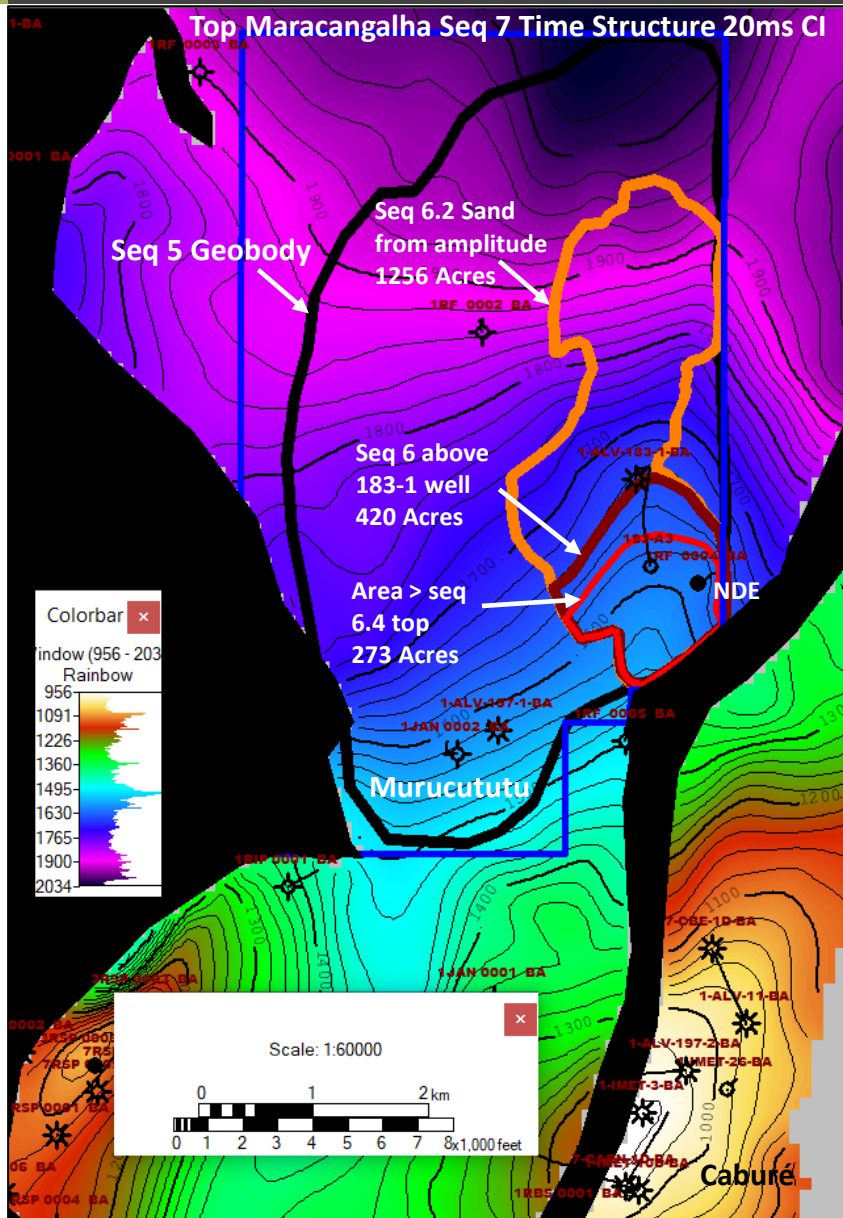

Murucututu Gas – Gomo + Caruaçu Development (100% ALV)

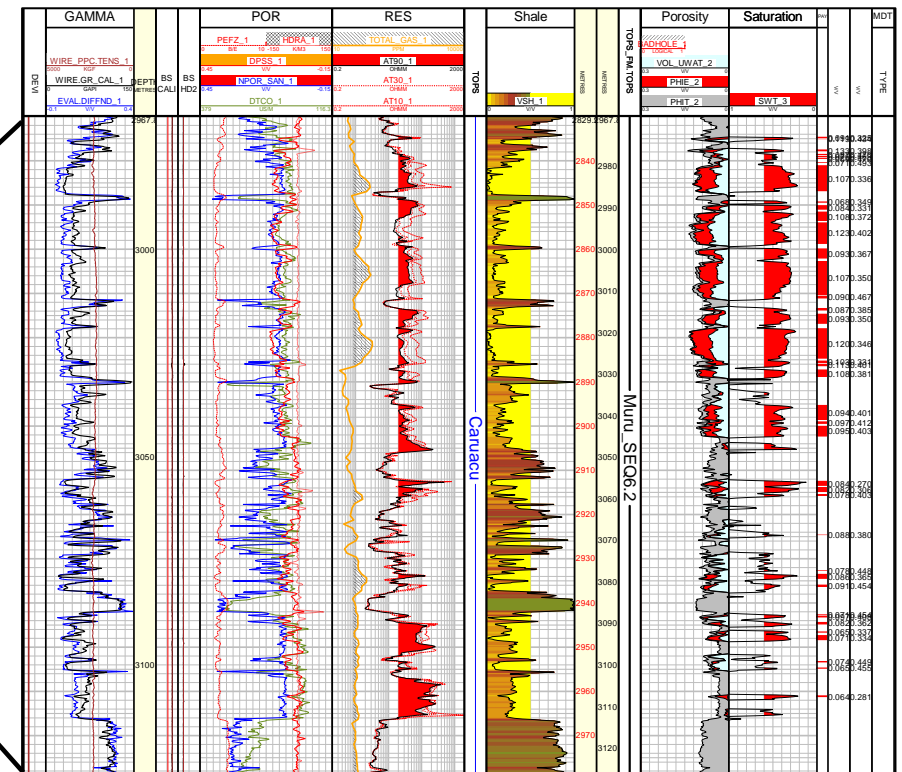

- 5,460-acre deep basin Gomo gas resource + Caruaçu
- 2P reserves: 4.6 MMboe (27.4 Bcfe), NPV10BT \$129.2 million⁽⁴⁾ including three development locations (183-A2, 197-A2, 197-A3)
- Risked Best Estimate Contingent Resource 5.4 MMboe (32.1 Bcfe), NPV10BT \$126.1 million⁽⁸⁾⁽¹¹⁾
- Risked Best Estimate Prospective Resource 9.6 MMboe (57.6 Bcfe) , NPV10BT \$184.9 million⁽⁸⁾⁽¹¹⁾

183-A3 Regional Caruaçu Stacked Sands DOWNDIP of Caburé (100% ALV)

- Structure-Strat combination trap defined for Caruaçu stacked sands downdip and across the Caburé Fault in the Caruaçu Member where a total of 116.1 metres of potential net natural gas pay was encountered between 2,542 metres and 3,062 metres, at an average 38.5% water saturation and an average porosity of 10.4%⁽¹²⁾. Alvo Petro currently has no reserves or resource assigned to this Target.
- The area in the 183-A3 Caruaçu structure/channel updip of the 183-A3 well is 273 acres, the area updip of our 183-1 well is 420 acres, and the seismically mapped amplitude trend covers 1,256 acres

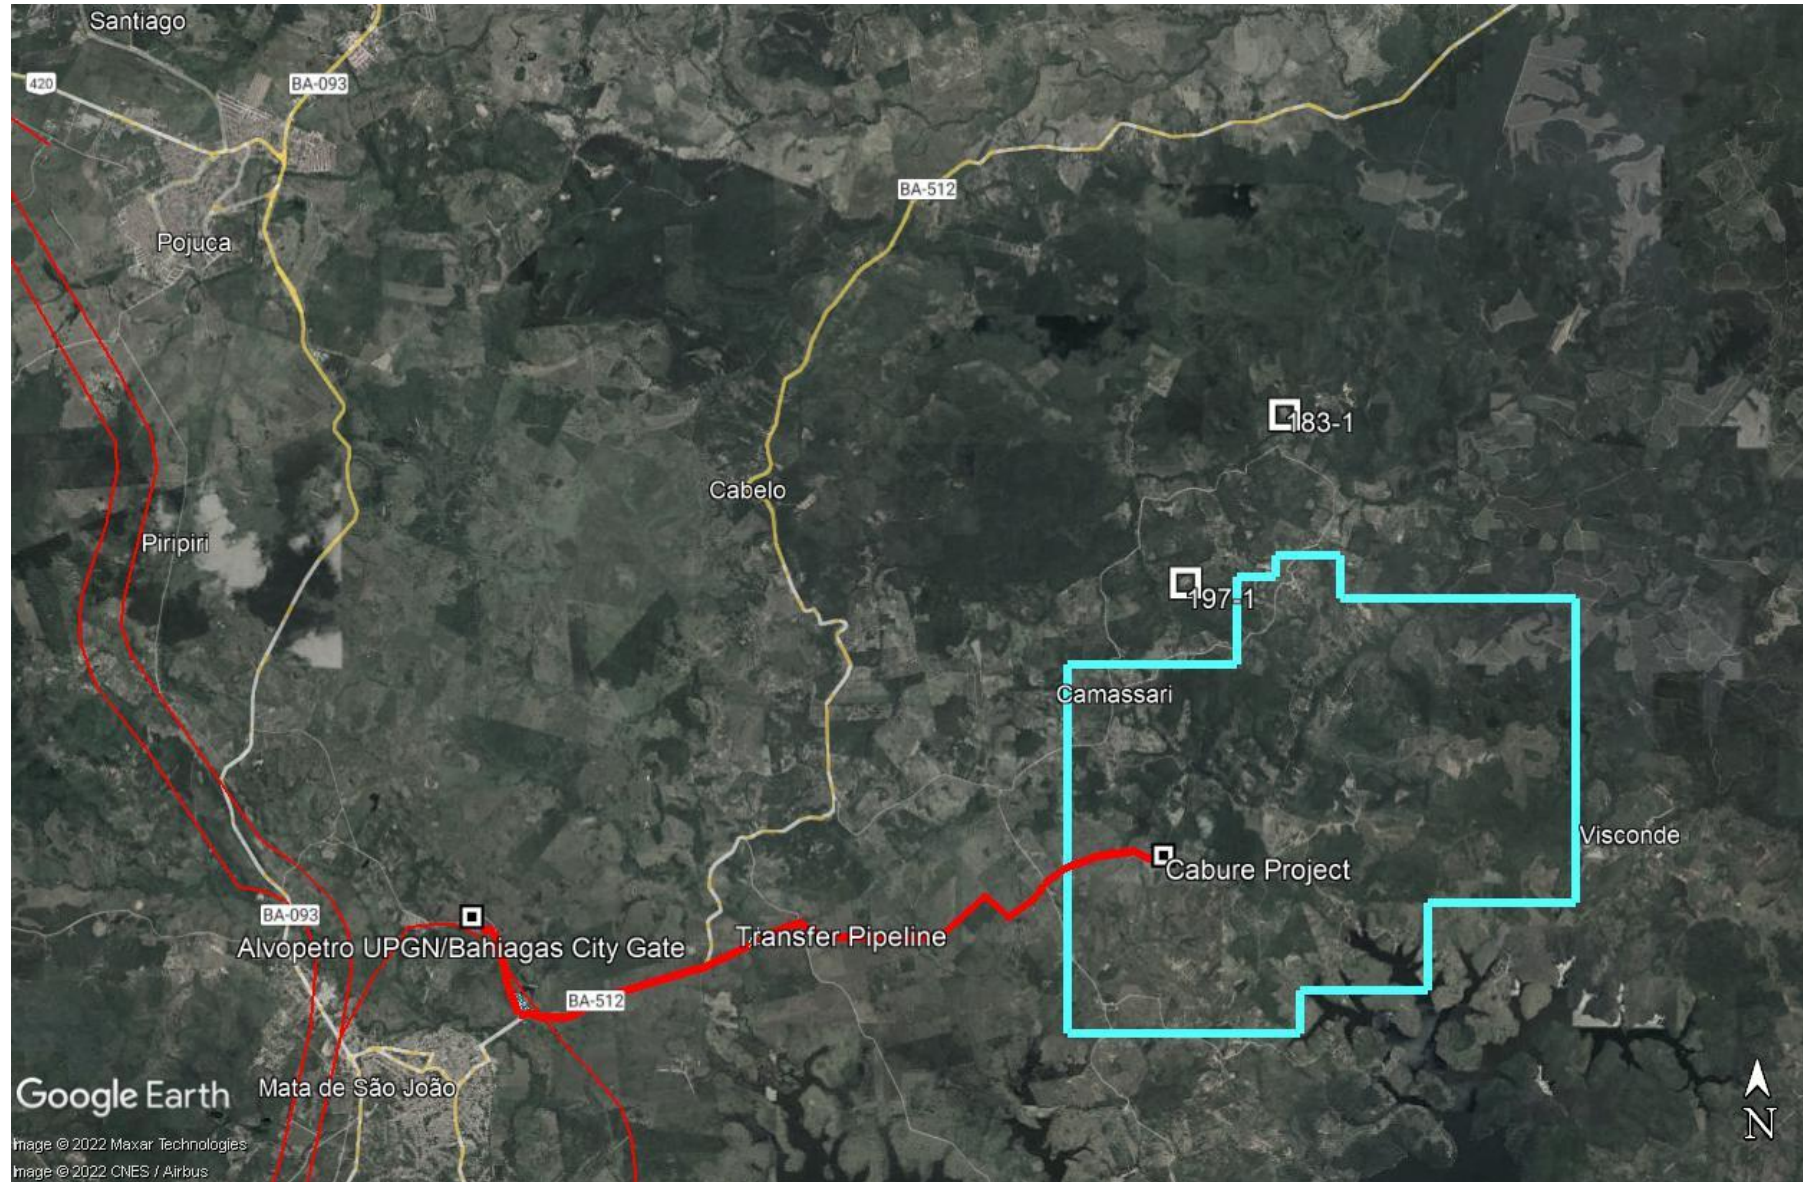

Expanded view of Sequence 6.2

Regional Seismic Section from Miranga-Murucututu-Caburé-Jaquipe

Murucututu 2021 (100% ALV)

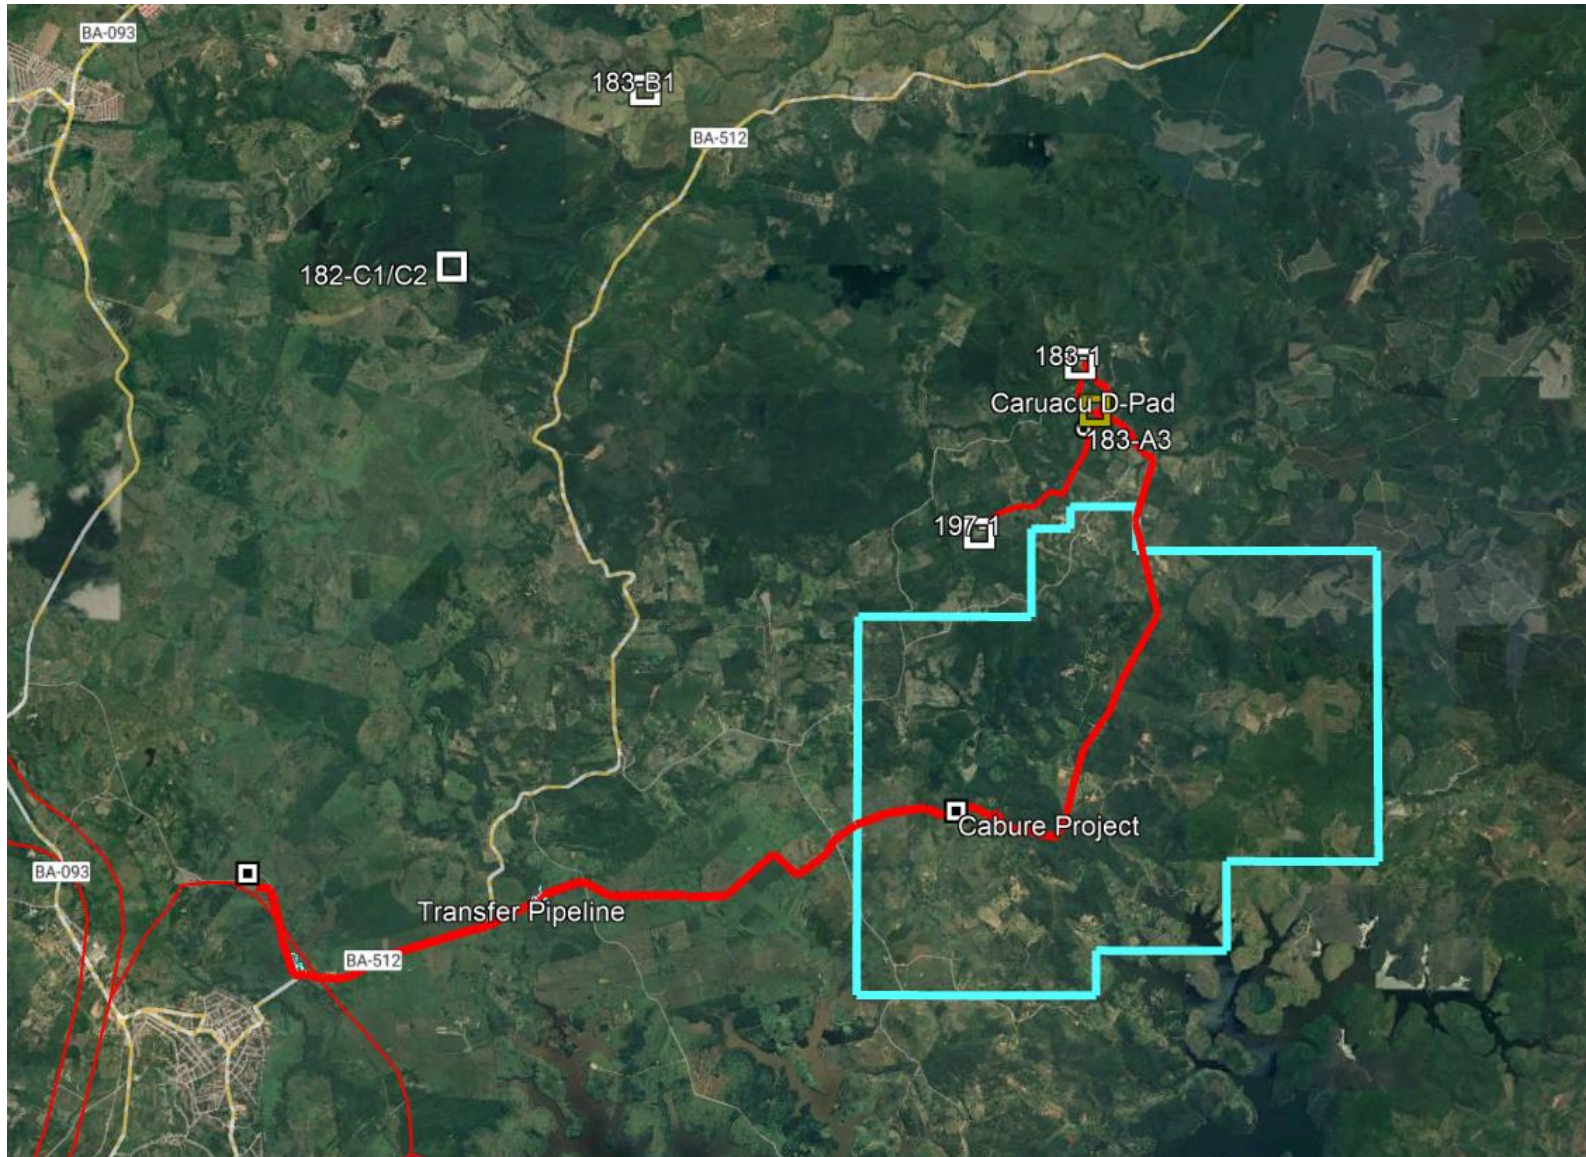

Murucututu 2022

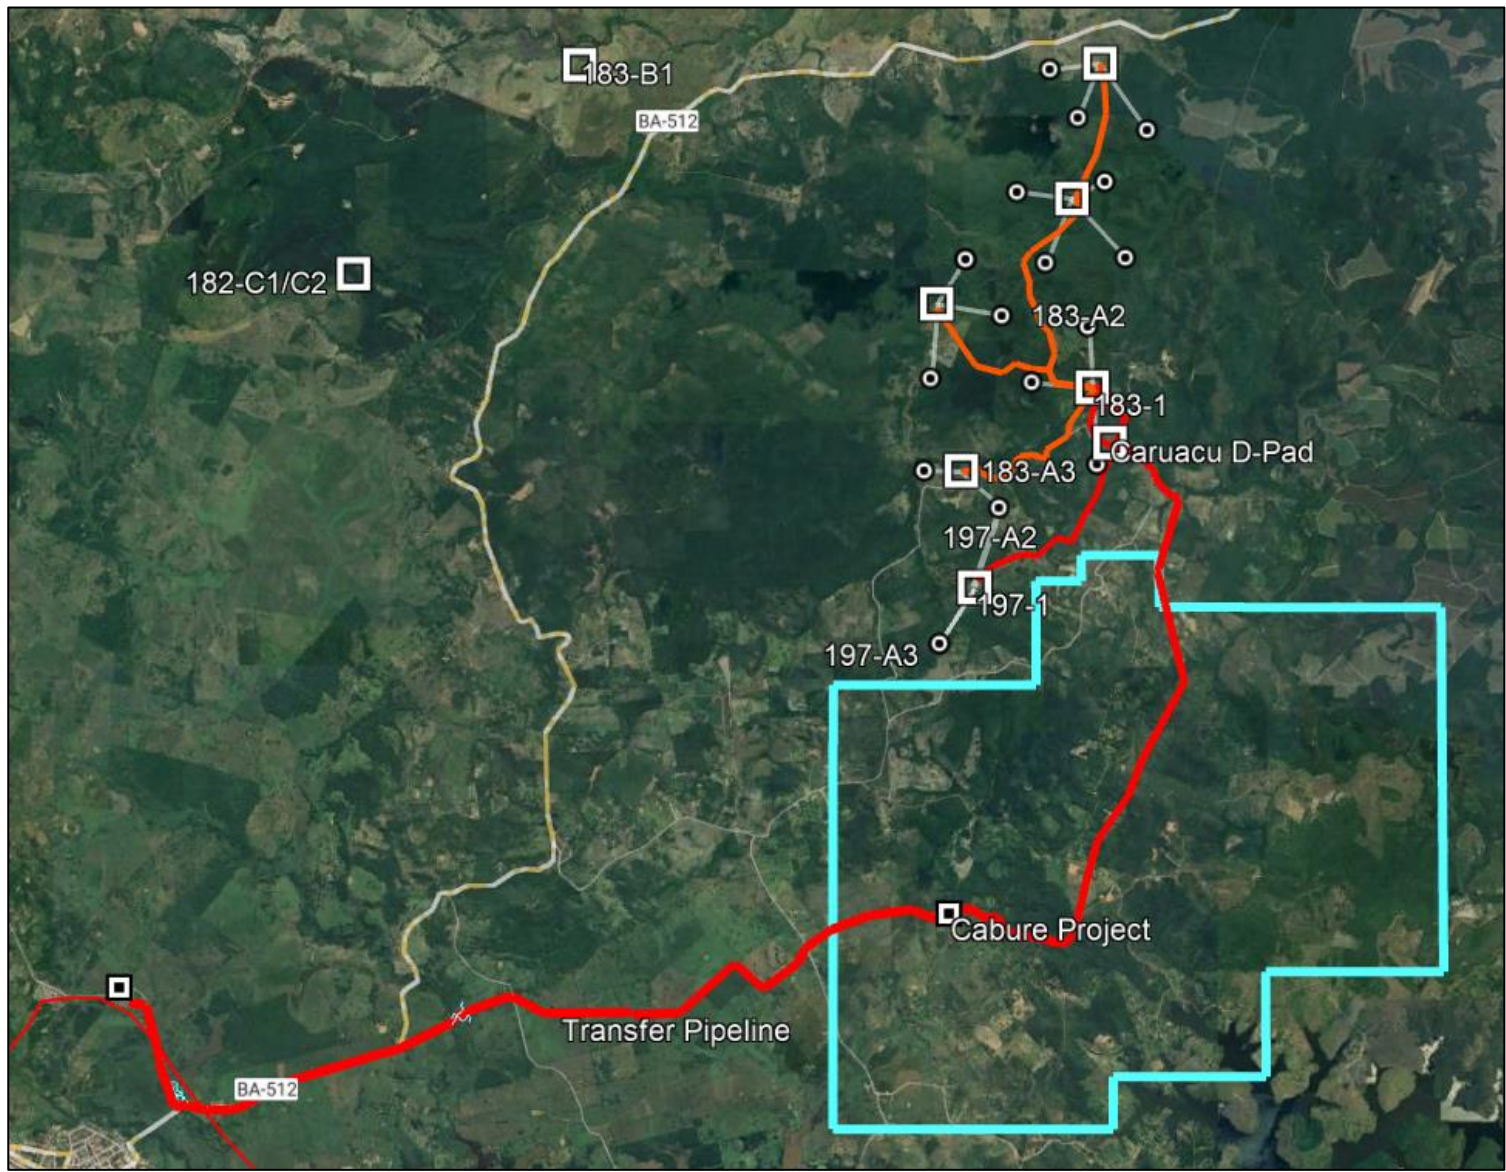

Murucututu Project Development 183-1 Location

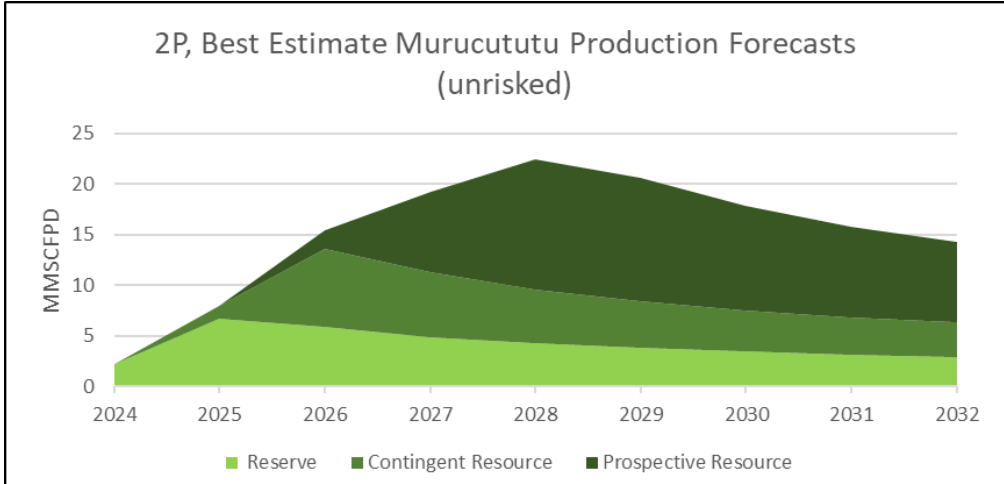

Murucututu Today

Murucututu Multi-Year Development Plan

- 2P Reserves: 3 existing wells + 3 undeveloped locations (183-A2, 197-A2 and 197-A3)
- Contingent Resource: 3 development wells
- Prospective Resource: 10 additional wells

ESG – 2022 Highlights

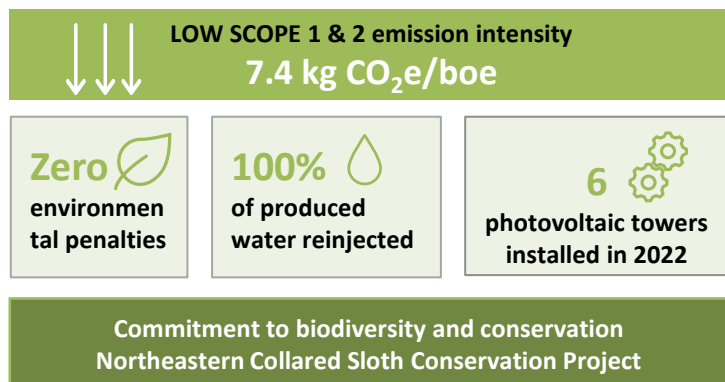

We are focused on responsibly supplying energy, minimizing our environmental impact, and generating lasting benefits for all our stakeholders

ENVIRONMENTAL

Responsibly Supply Energy

Minimize Our Impact

SOCIAL

Strengthening Our Communities

Committed to Safe Operations

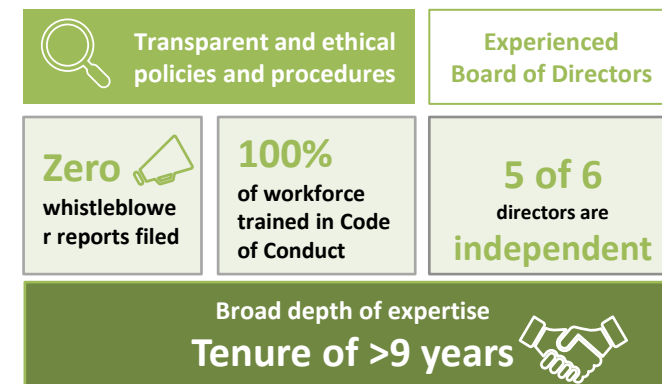

GOVERNANCE

Diversity & Talent

Ethics and Compliance

2023 Voluntary Social Investment Plan

Cautionary Statements

- **Forward Looking Statements.** This presentation contains forward-looking statements including forecasted future earnings and sales volumes, forecasted natural gas prices under the Company's long-term gas sales agreement, the anticipated timing of projects, future exploration and development plans (including the timing and associated spending of such), Alvopetro's working interest in properties and the outcome of any redeterminations including the redetermination of the working interests on the unitized area including Caburé which is currently underway, the Company's dividend policy and plans for dividends and other returns to stakeholders in the future, and results from future operations. These statements are based on current assumptions and judgments that involve numerous risks and uncertainties, which may cause actual results to differ from those anticipated. These risks include, but are not limited to: the outcome of any redeterminations, the timing of regulatory licenses and approvals, equipment availability, the impact of pandemics and other worldwide events, the ability to access capital markets, the risks inherent in the oil and gas industry, operational risks relating to exploration, development and production; potential delays or changes in plans with respect to exploration or development projects or capital expenditures; the uncertainty of reserve estimates; the uncertainty of estimates and projections relating to production, costs and expenses, and health, safety and environmental risks; and fluctuations in foreign currency exchange rates and commodity prices. Alvopetro's working interest in the Caburé natural gas field is subject to redeterminations, the first of which is underway. Alvopetro's working interest may be adjusted higher or lower and the resulting impact on Alvopetro's reserves and future cash flows may be material. The declaration, timing, amount and payment of future dividends remain at the discretion of the Board of Directors. As a consequence, actual results may differ materially from those anticipated in the forward-looking statements. Certain of these risks are set out in more detail in our 2023 MD&A and in our 2023 Annual Information Form all of which are available on SEDAR+ and can be accessed at www.sedarplus.ca.
- **Testing and Well Results.** There is no representation by Alvopetro that the data relating to any drilling or test results contained in this presentation is necessarily indicative of long-term performance or ultimate recovery. The reader is cautioned not to unduly rely on such data as such data may not be indicative of future performance of the well or of expected production or operational results for Alvopetro in the future. Data included herein including net pay and porosities should be considered to be preliminary until further testing, pressure transient analysis and other detailed analysis and interpretation has been completed.
- **Non-GAAP and Other Financial Measures.** This presentation contains financial terms that are not considered measures under International Financial Reporting Standards ("IFRS"), such as average realized natural gas price (\$/Mcf), average realized NGL – condensate price (\$/bbl), average realized oil price (\$/bbl), averaged realized price (\$/boe), funds flow from operations, funds flow from operations per share, operating netback, operating netback per boe, operating netback margin, working capital and working capital net of debt. For further information and reconciliation to these GAAP measures, see "Non-GAAP and Other Financial Measures" in our most recent MD&A. Operating netback margin is computed as operating netback per boe divided by average realized sales price per boe. This presentation also refers to funds flow per boe. Funds flow per boe is computed as funds flow from operations divided by total sales volumes (barrels of oil equivalent). The non-GAAP and other financial measures within this presentation may not be comparable to those reported by other companies nor should they be viewed as an alternative to measures of financial performance calculated in accordance with IFRS.
- **Boe disclosure.** The term barrels of oil equivalent ("boe") may be misleading, particularly if used in isolation. A boe conversion ratio of six thousand cubic feet per barrel (6Mcf/bbl) of natural gas to barrels of oil equivalence is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. All boe conversions in this news release are derived from converting gas to oil in the ratio mix of six thousand cubic feet of gas to one barrel of oil.
- **Currency.** All amounts within this presentation are in U.S. dollars, unless otherwise noted.

Cautionary Statements

- **Net Present Value and Reserves Disclosed.** The net present value of future net revenue attributable to Alvopetro's reserves is stated without provision for interest costs and general and administrative costs, but after providing for estimated royalties, production costs, development costs, other income, future capital expenditures, well abandonment and reclamation costs for only those wells assigned reserves and material dedicated gathering systems and facilities for only those wells assigned reserves by GLJ Ltd. ("GLJ") respectively. The GLJ evaluation was dated February 26, 2024, with an effective date of December 31, 2023 (the "GLJ Report"). Full disclosure with respect to the Alvopetro's reserves as at December 31, 2023 is included in the annual information form for the year-ended December 31, 2023 which has been filed on SEDAR+ (www.sedarplus.ca). It should not be assumed that the undiscounted or discounted net present value of future net revenue attributable to the Alvopetro's reserves estimated by GLJ represent the fair market value of those reserves. Actual reserves may be greater than or less than the estimates provided herein. Possible reserves are those additional reserves that are less certain to be recovered than probable reserves. There is a 10% probability that the quantities actually recovered will equal or exceed the sum of proved plus probable plus possible reserves. The GLJ Report incorporates Alvopetro's working interest share of remaining recoverable reserves. With respect to the Caburé natural gas field, Alvopetro's working interest was 49.1% as of December 31, 2023 but is subject to redetermination, the first of which is currently underway. The outcome of this redetermination is unknown and the resulting impact on the reserves and the net present value of future net revenue attributable to such reserves as presented herein may be material.
- **Prospective Resources.** This presentation discloses estimates of Alvopetro's prospective resources as evaluated by GLJ with an effective date of December 31, 2023. There is no certainty that any portion of the prospective resources will be discovered and even if discovered, there is no certainty that it will be commercially viable to produce any portion. Estimates of prospective resources involve additional risks over estimates of reserves. The accuracy of any resources estimate is a function of the quality and quantity of available data and of engineering interpretation and judgment. While resources presented herein are considered reasonable, the estimates should be accepted with the understanding that reservoir performance subsequent to the date of the estimate may justify revision, either upward or downward. Prospective resources have both a chance of discovery and a chance of development, which combined represent for any undiscovered accumulation its chance of commerciality. Please refer to the noted news release dated February 26, 2024 for additional information. Supplementary information is included in the Company's annual information form for the year-ended December 31, 2023 which has been filed on SEDAR+ (www.sedarplus.ca).
- **Contingent Resources.** This news release discloses estimates of Alvopetro's contingent resources and the net present value associated with net revenues associated with the production of such contingent resources as evaluated by GLJ with an effective date of December 31, 2023. There is no certainty that it will be commercially viable to produce any portion of such contingent resources and the estimated future net revenues do not necessarily represent the fair market value of such contingent resources. Estimates of contingent resources involve additional risks over estimates of reserves. For additional details with respect to Alvopetro's contingent resources, please refer to our news release dated February 26, 2024. Additional disclosure with respect to the Alvopetro's contingent resources as at December 31, 2023 is included in the Company's annual information form for the year-ended December 31, 2023 which has been filed on SEDAR+ (www.sedarplus.ca).

Endnotes

1. As of March 19, 2024. Average daily trading volume is based on average volumes traded on all Canadian exchanges (TSXV and other Canadian) and on the OTCQX in the six months commencing on September 20, 2023 and ending on March 19, 2024.
2. Enterprise value of \$136.3 million is computed as US\$ market cap of \$149.4 million as of March 19, 2024 adjusted for working capital as of December 31, 2023 of \$13.1 million. US\$ market cap of \$149.4 million is based on C\$ share price (TSXV) and 36,617,940 shares outstanding as of March 19, 2024, converted to US\$ market cap based on March 19, 2024 exchange rate of C\$1.3581/\$1US. Enterprise value to annualized funds flow from operations is based on the enterprise value as of March 19, 2024 divided by annualized funds flow from operations based on the funds flow from operations for the three months ended December 31, 2023.
3. Working capital as of December 31, 2023. Funds flow from operations for the three months ended December 31, 2023. See *'Non-GAAP and Other Financial Measures'* in Cautionary Statements.
4. Proved ("1P") reserves, proved plus probable ("2P") reserves, and proved plus probable plus possible ("3P") reserves evaluated by GLJ as of December 31, 2023. See Alvopetro's press release dated February 26, 2024 for further details. Full disclosure with respect to the Company's reserves is included in the Company's annual information form for the year-ended December 31, 2023 has been filed on SEDAR+ (www.sedarplus.ca).
5. The natural gas price is set semi-annually in Brazilian Real/m³. As of February 1, 2024, the natural gas price is BRL1.94/m³. Realized prices in US\$/Mcf will fluctuate with fluctuations in the BRL/USD exchange rate. With enhanced sales tax credits expected to continue to apply in 2024, our realized natural gas price, net of sales taxes, is estimated at \$12.36/Mcf as of February 1, 2024 (based on our average heat content to date and the USD/BRL foreign exchange rate on January 31, 2024 of 4.95). See GLJ Ltd.'s most recent price forecast at <https://www.gljpc.com/sites/default/files/pricing/Jan24.pdf>.
6. Based on EIA & EPA average energy and emissions intensities.
7. Working capital is computed as current assets less current liabilities.
8. Contingent and Prospective Resources on Alvopetro's Murucututu property as evaluated by GLJ with an effective date of December 31, 2023. See Alvopetro's press release dated February 26, 2024 for further details. Additional disclosure is included in the Company's annual information form for the year-ended December 31, 2023 which has been filed on SEDAR+ (www.sedarplus.ca).
9. For any abbreviations referred to herein, refer to our most recent MD&A or our AIF, both of which are filed on SEDAR+ (www.sedarplus.ca).
10. See *'Non-GAAP and Other Financial Measures'* in Cautionary Statements.
11. See *'Prospective Resources'* and/or *'Contingent Resources'* in Cautionary Statements.
12. See *'Testing and Well Results'* in Cautionary Statements.
13. Alvopetro's working interest share of the unitized area (the "Unit") including Alvopetro's Caburé and Caburé Leste fields and two fields held by a third-party is currently 49.1%. The working interest is subject to redetermination, the first of which is underway. An independent expert (the "Expert") has been engaged to evaluate the redetermination and the impact to each party's working interest. The outcome of the Expert's decision and the resulting working interest to Alvopetro following the decision is uncertain and the resulting impact on Alvopetro's reserves and future cash flows may be material and may have a material adverse effect on Alvopetro.
